DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bridger et al.

Regarding claim 1, Bridger et al., discloses a semiconductor physiological sensing device (see claim 63) with features of the claimed invention including a force transmitting means for applying force to a diaphragm (element 31), which is constituted by a rigid sphere, wherein through holes passing through opposed wall section (see figures 7-9) in a direction of the diaphragm (element 31) is formed. The holes are shape to accept part of the sphere to let it moves orthogonal to the diaphragm.

Regarding claim 2, Bridger et al., discloses a cylindrical base section (element 21).

Regarding claims 6-7, Bridger et al., shows lid member (element 54, figure 3).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2855

4. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bridger et al.

14-15, Bridger does not elaborate on the material of the case, however, it would have been obvious for a skilled artisan at the time of the invention to modify his device to provide for any suitable material for the case such as ceramics (as suggested in one or prior art, see col. 6, line 41).

5. Claims 3-5, 8-13, 16, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 17 is allowed over the prior art of the record.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 P.M.
